

Tahir Pinder McKinley High

GTEST GIS Summer Camp 2018

Purpose

The purpose of my story map is to point out the dangers of the palm oil industry. The carbon emmmisions, threat to wildlife, deforestation and several others.

Location

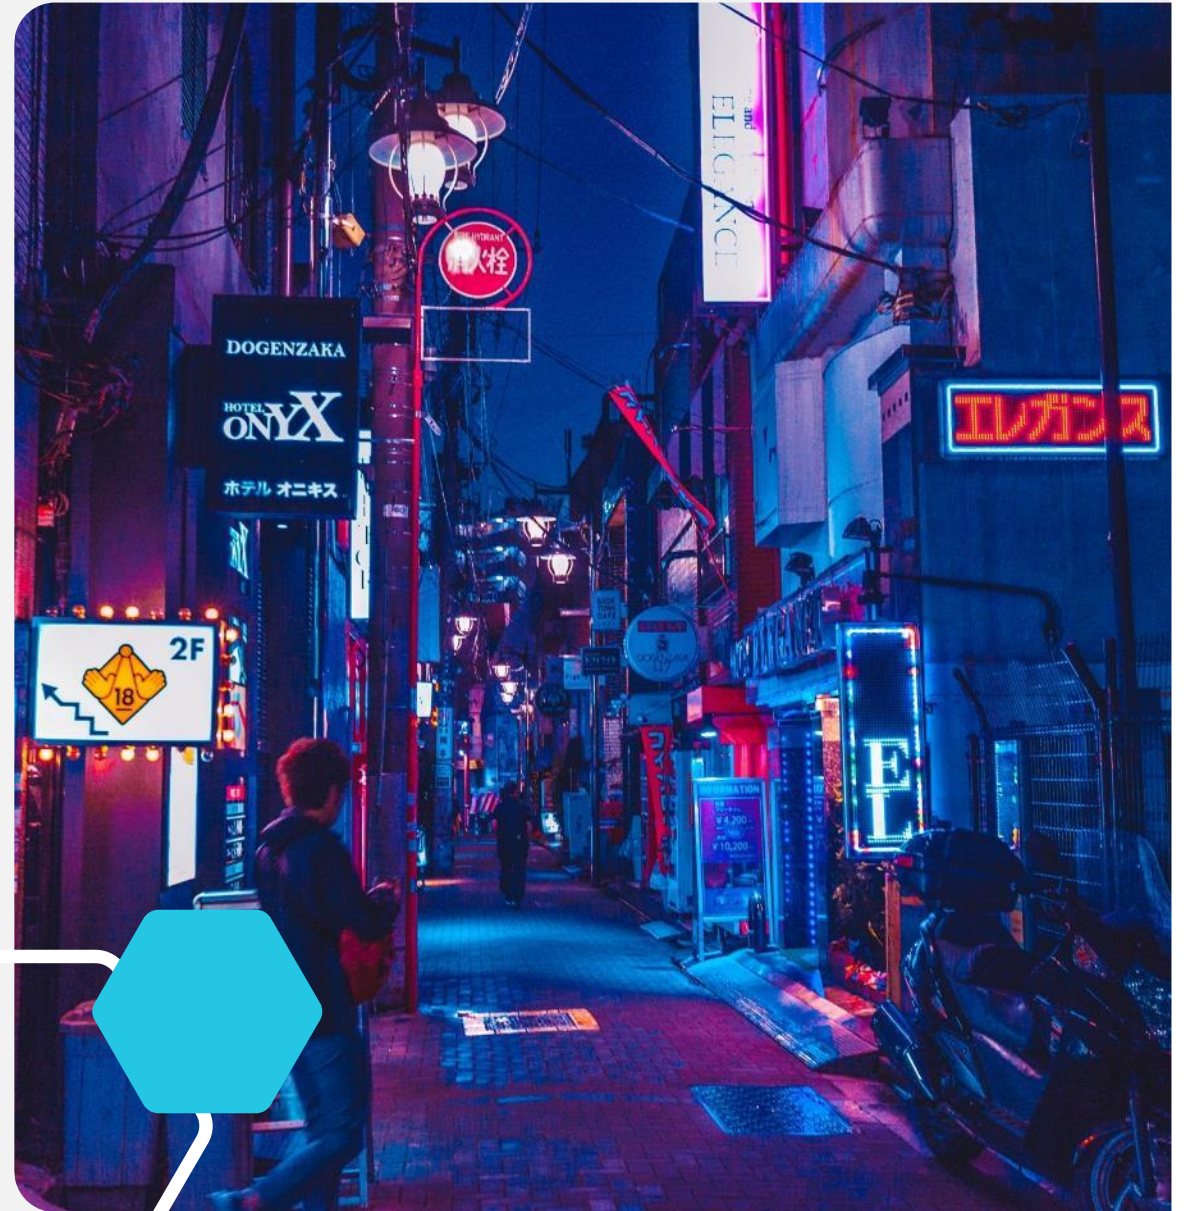

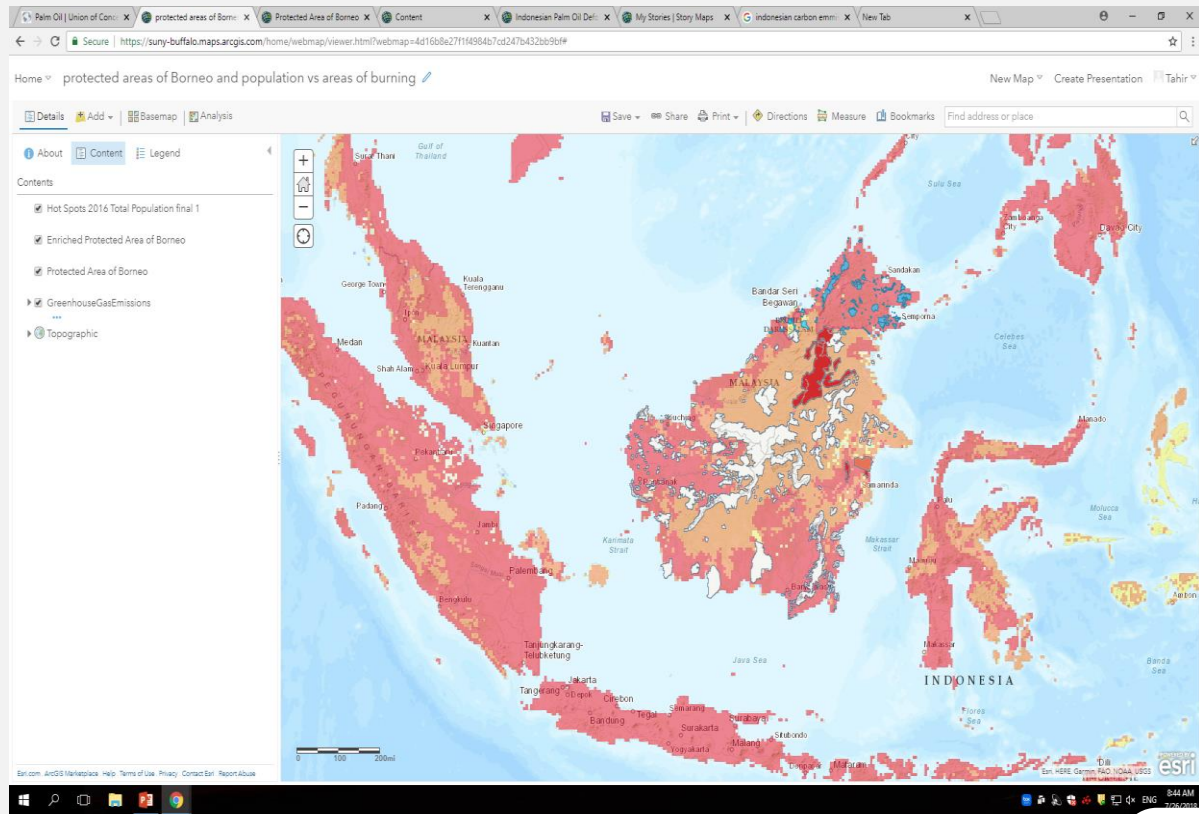

The story takes place in the south of Asia, mostly in Indonesia and Malaysia. But more specifically in Borneo, IN.

Analysis

The analysis used was hot spot analysis. Basically I did hotspot analysis on the protected areas for population, to see where people were living in these protected areas and in what amount.

Results

Where I got my information from

My Career Path

- Who am I
 - I like video games, soccer, bike riding, drawing/animation
 - I'm good at drawing and graphic design
- Where am I headed
 - The career I researched is Graphic Design
 - What they do is create designs for clients, sometimes put designs from a computer to a shirt, page or cloth.
 - What I like about what they do is their creative permission, working for yourself or clients, creating designs.
- How can I get there
 - This summer I will take part in some kind of internship for graphic design or interview a graphic designer.
 - This year I will take up a graphic design class, speak with my printing teachers, study for the SAT's and try to join a club, internship
- People who can help me along my career path are
 - My parents, a mentor, a teacher, a graphic designer
- What can I do with GIS
 - Map making
 - Use Sketch Up to make 3D designs
